

Naktuinbouw register of certifiable varieties of fruit crops

Official description

TG/40/6

Product report	family:	genus	species	variety
Botanical name:	Grossulariaceae	Ribes	nigrum	'Titania'
synonym				
trade mark:			selection:	
Origin:	Sweden			
variety of parents:	'Altajskaja Desertnaja'	x	('Consort' x 'Kajaanin Musta')	
date of crossing:				
mutant of:	xxx	selection of:	xxx	
date of introduction:	1985	introduced by:	P.Tamas, Tollarp	
date of registration:	1994	registrated by:	Naktuinbouw	NL - 1241

1	Plant:	height	7	tall	
		vigor	7	strong	
2		diameter	7	large	
3		ratio heght/diameter	5	medium	
		density	7	dense	
	habit	7	spreading		
4	number of basal shoots	7	many		
5	Bud:	anthocyanin coloration	9	very strong	
6		bloom			
7	Young shoot:	anthocyanin coloration	7	strong	leaf and stem
8	Leaf:	main green color	5	medium	of upper side
9		glossiness	5	medium	of upper side
10		shape of base of blade	3	open	
11		anthocyanin coloration			of petiole
12	distribution of anthocyanin			of petiole	
13	Flower:	predom.nr.of flower trusses	2	more than two	per bud
14	Sepal:	anthocyanin coloration			
15	Ovary:	anthocyanin coloration			
16	Fruit:	size	7	large	
17		shape	7	long round	
18		firmness	6	medium to firm	
19		color	1	black	
20		weight of 100 berries	7	large	130-160 gr.
21	Time of:	bud burst	5	medium	
22		beginning flowering	5	medium	
23		fruit ripening	4	early to medium
